

Forest Stewardship Council® (FSC®)

FSC® is an independent, nongovernment, not-for-profit organisation established to promote the responsible management of the world's forests.

- Buying FSC® products supports the growth of responsible forest management worldwide.
- FSC® is the fastest growing forest certification in the world with 183 million hectares certified across 80 countries, representing the equivalent of 5% of the world's productive forests.
- FSC® has been available in Australia since February 2006 and is represented by our own national initiative FSC® Australia.
- Forests are inspected and certified to strict standards and must be managed in an environmentally sound, socially beneficial and economically viable way.
- Finsbury Green, a Chain of Custody certified printer, purchases FSC® certified paper and tracks the path taken by the raw material from the sustainable forest to the consumer.
- 87% of our total manufacturing paper usage was FSC® certified papers.
- Clients can publish the FSC® trademark on printed product as a sign of their commitment to an eco-advantaged product.
- Designers, marketers and buyers of print can specify FSC® certified papers and printers.
